

Laboratory 5 – week 9 and 10

For this laboratory, you will continue working on:

- Implementation: Please continue working on implementing features in your application, test and make sure you are on track to have everything ready by Laboratory 7 when each team will present their work. Please update your git repositories constantly.
- Diagrams: Please check your Trello for comments/suggestions if there is a need for improvement.
- Presentations: Each team will present their work during Laboratory 7 (week 13 and 14). Considering the current situation, the presentations will be held online. I will upload further details on how we will organize the presentations (once again, my Skype ID and email is: andreeadaliablaga@outlook.com).
- Questions: I am available for questions during lab hours. Do not hesitate to contact me 😊.
